EDUCATION

Bachelor of Science in Computer Science

The University of Texas at El Paso (UTEP)

El Paso, TX

Graduation: Fall 2026

Honors/Awards: Dean's List Fall 2022 | Spring 2023, Google Conference Scholar, Grace Hooper Kalama Scholar, Leader of Mines GPA: 3.50

Relevant Coursework: Software Engineering I, Agile Programming, Data Structures & Algorithms, Advanced Object-Oriented Programming

EXPERIENCE

Software Engineer Intern

Lockheed Martin

Remote

May 2026 – Present

- **Architecting** an autonomous **AI incident triage agent** for smart manufacturing operations across 20+ factory sites, using **Python** and a **ReAct (Reason-Act-Observe) loop** with OpenAI-style function calling to diagnose equipment failures and reduce manual troubleshooting time
- **Building a Retrieval-Augmented Generation (RAG) pipeline** with **ChromaDB** and custom embeddings to semantically search operational documentation, plus a **log analysis tool** that filters logs by asset ID to surface root-cause evidence
- **Migrating** the agent to **LangGraph**, architecting the core LLM node and conditional routing logic to direct execution between tool calls and deterministic actions, with a safety guard preventing infinite tool-calling loops in production
- **Automating ticket lifecycle management** and engineer notifications with ServiceNow-style incident records, and authoring a **12-test unit suite** validating log filtering, ticket updates, and notification integrity

Machine Learning Research Intern

Brookhaven National Laboratory

Yaphank, NY

June 2025 – August 2025

- **Trained an implicit neural representation (INR) model** on **4D fMRI imaging data** to reconstruct full brain volumes over time
- Implemented **PyTorch Dataset and Data Loader** classes to stream large-scale 4D spatiotemporal data from **.nii.gz (NIFTI)** files
- Designed the initial **GitHub repository structure and version control workflow** to support collaborative machine learning research
- Conducted **literature reviews** to build foundational knowledge of data-driven modeling, multimodal datasets, and irregular time series
- **Presented** research progress in a **lab-wide symposium**; authored an abstract aligning project objectives with DOE mission priorities

Google Tech Exchange Program

Participant in semester-long academic program led by **Google Engineers**

Remote

January 2024 – May 2024

- **Selected** in a group of **250 students** out of **1500 students** nationwide for a program focused on underrepresented computer science talent
- **Completed rigorous coursework** in **Data Structures & Algorithms** and **Software Development** taught by **Google engineers**
- Participated in **weekly technical interview prep** and mock interviews with Google software engineers, receiving feedback and coaching
- Built **Schedule Sphere** a **full-stack** scheduling app using **Python, Google Gemini API**, and user input; led development of the business page to generate optimized work schedules

PROJECTS

UTEP SHPE/MAES Mobile App | React Native, TypeScript

- **Lead development** of a React Native (Expo) mobile app for a 100+ member engineering organization
- **Manage and mentor** a team of **student developers**, conduct code reviews and coordinate releases via GitHub
- Manage GitHub workflows including branching, pull requests, and code reviews for a team of student developers.

LEADERSHIP

Vice President | Girls Who Code

August 2024 – May 2026

- **Lead chapter operations** and **executive board** to advance Girls Who Code's mission on campus
- Facilitated **5+ coding and professional development** sessions and workshops to **enhance** more than **15 members' technical/soft skills**
- **Promote inclusivity** and **representation** in tech through community-driven programming
- **Oversee** event planning, outreach, and **technical workshop execution** for 20+ members

Director of Technology | Society of Professional Hispanic Engineers (SHPE)

July 2025 – May 2026

- **Oversee two technical teams** (website + mobile app), **coordinating workflows**, and **delegating tasks** for a 100+ member chapter
- **Manage GitHub repository**, enabling **collaboration** across officers and maintaining reproducibility of code contributions
- **Direct** and **mentor** the web **committee**, assigning tasks, reviewing progress, and ensuring quality control across all technical projects
- **Lead end-to-end** mobile app development by **designing** and **running hands-on workshops** that guide members through planning, coding, and deployment, fostering technical growth and collaboration
